PROFESSIONAL SUMMARY

Infrastructure / DevOps Engineer with 3+ years of production experience across financial services and technology startups. Proven track record in Linux systems engineering, cloud infrastructure (AWS, Azure), CI/CD pipeline automation, and Kubernetes-based deployments. Currently pursuing M.Sc. in Computer Science at the University of Louisville, with research interests in software systems and data-driven applications. Seeking to bring enterprise-grade reliability practices to high-growth engineering teams.

TECHNICAL SKILLS

Languages & Scripting: Python, Bash

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD Pipelines, Infrastructure as Code (Terraform – foundational), Netlify, Heroku

Systems & Software: Linux (Ubuntu, RHEL), Windows Server, Active Directory, Microsoft Exchange, Office 365

Monitoring & Observability: Dynatrace, Grafana, Log Analysis, System Diagnostics, Performance Monitoring

Web & Frameworks: Django, WordPress (CMS)

PROFESSIONAL EXPERIENCE

Application Infrastructure Engineer | *Zenith Bank Plc – Lagos, Nigeria* Jul 2023 – Jan 2026

- Led full migration of mobile banking servers from Windows to Linux, improving system stability and driving uptime from ~85% to 99.2% across critical electronic banking channels.
- Maintained high availability of mission-critical banking infrastructure using Dynatrace and Grafana dashboards, proactively identifying and resolving performance bottlenecks before customer impact.
- Reduced mean-time-to-resolution (MTTR) for infrastructure and application incidents through structured server log analysis and root cause documentation, improving team incident response workflows.
- Authored and maintained internal runbooks, troubleshooting guides, and post-mortem reports to support operational continuity and onboarding of new engineers.
- Evaluated and piloted Terraform for infrastructure-as-code initiatives within the infrastructure team, laying groundwork for automated provisioning.

DevOps Engineer Intern | *Tramango Limited – Lagos, Nigeria* Jan 2022 – Feb 2023

- Designed, provisioned, and maintained AWS cloud infrastructure (EC2, S3, RDS) supporting development, staging, and production environments for a travel-tech product serving thousands of users.
- Reduced deployment time by ~40% by automating application rollouts across AWS, Netlify, and Heroku using Bash scripting and CI/CD pipeline configurations.
- Built and shipped full-stack features using Django and WordPress, contributing directly to new product capabilities and iterating based on user feedback in an agile environment.
- Collaborated cross-functionally with product and engineering teams on new product development — functioning as a generalist engineer in a resource-constrained startup environment.

Graduate Trainee | *Meristem Securities Limited – Lagos, Nigeria* May 2023 – Jul 2023

- Supported internal system evaluations and contributed to process improvement initiatives, producing technical documentation and reports for operational reviews.
- Participated in structured technical training, cross-team presentations, and collaborative problem-solving exercises.

EDUCATION

M.Sc. in Computer Science – University of Louisville, Louisville, KY Expected: December 2027

Relevant Coursework: Data Structures & Algorithms, Cloud Computing, Database Systems

B.Eng. in Computer Engineering – Covenant University, Ogun, Nigeria September 2021

RESEARCH & PROJECTS

Precision Agriculture Web Application | *Python, Django, HTML, CSS, JavaScript*

- Built a data-driven web platform enabling farmers to monitor real-time environmental data (temperature, humidity) with structured visualizations to support agricultural decision-making.
- Demonstrates end-to-end full-stack development competency: data ingestion, backend logic (Django), and interactive frontend rendering.

CERTIFICATIONS

- Google IT Support Professional Certificate (2020)
- IBM Introduction to Cloud Computing (2023)
- AWS Certified Cloud Practitioner (In Progress)

LEADERSHIP & SERVICE

Community Development Volunteer (President) | *NYSC – Lagos, Nigeria* Dec 2021 – Nov 2022

- Led community outreach programs delivering educational materials to underserved populations; coordinated local infrastructure and educational access initiatives.

PROFESSIONAL AFFILIATIONS

Member, Association for Computing Machinery (ACM), 2026–Present
